# Introduction

# Welcome to Delta

- Delta is an enhanced fork of Slydst, designed for creating professional presentations with Typst.
- This presentation showcases new features and customization options.

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore.

# Customization Options

## Changing Themes and Colors

- You can also set a custom base-hue (e.g., current hue is 168deg) for a unique color scheme.
- Override colors directly via `title-color` if needed.

```
#show: slides.with(  
  title: "My Presentation",  
  title-color: rgb(255, 100, 100) // Custom title color  
)
```

## Customizing Fonts and Sizes

- Change the font for text and code blocks with `font` and `code-font` parameters.
- Adjust text size globally with `font-size`.

```
#show: slides.with(  
  title: "My Presentation",  
  font: "Roboto", // Custom text font  
  code-font: "JetBrains Mono", // Custom code font  
  font-size: 10pt // Smaller text size  
)
```

# New Slide Types

## Focus Slide for Emphasis

- Use `#focus-slide` to create a standout slide with a custom background and text color.
- Ideal for key points or announcements.

**This is a Focus Slide! Highlight your most important message here.**

## Two-Column Slide Layout

- Use `#two-column-slide` for side-by-side content.
- Customize column ratios with `left-ratio` and `right-ratio`.

# Custom Two-Column Slide

## Left Column Content

- Point 1
- Point 2
